VILLAGE OF SPRING LAKE INFRASTRUCTURE PROJECT

[SPRING LAKE, MICHIGAN] Aging infrastructure in the Village poses a threat to public health and safety and is in immediate need for replacement. Through using the asset management plans and input from the Village staff, a Capital Improvement Plan (CIP) was developed. The Capital Improvement Plan rated the condition and capacity of the utilities over the whole Village service area. Based on these scores, the top six project sites were identified as the most critical conditions. Findings from the 2021 CIP scored the top six project sites in need of replacement:

1. South Street from Meridian Street to Prospect Street
2. South Lake Lift Station
3. Monarch Street/Dixie Street/Rex Street from Liberty Street to the North Termini
4. North Park Street from Savidge Street to Barber Street
5. Prospect Street from South Street to Savidge Street
6. Summit Street

The Village invites Spring Lake Village residents to Spring Lake District Library on December 7th from 5:30PM to 7:30PM. This will be the opportunity to understand the project, how it may affect your household, and ask questions.

Sincerely,

Tyra Jonas
Communications Specialist
Village of Spring Lake
